

Objective: Create a simple use-case diagram for a Library Management system.

A Library Management system is a software that helps manage the daily activities in a library, like issuing books and managing members.

There are two main actors in this system.

- Librarian — Manages book check-out.
- Member — Borrows and returns book.

main use cases include:

- check out Book — Done by both Librarian and member.
- Return Book — Performed by the Member.
